

IBM i Security Software
& Services

I.GAYTE.IT : Security Software & Services for IBM i

Mission

[I.GAYTE.IT](#) (pronounced “I get it” in English) is a wordplay referring both to IBM i and to Dominique Gayte, the founder of [I.GAYTE.IT](#), as well as to his passion for sharing knowledge.

[I.GAYTE.IT](#) is, first and foremost, a team of multidisciplinary experts whose skills are centered on the IBM i platform. While the company is now one of the leaders in IBM i security, it also operates in all areas requiring high added value, including complex development, application modernization, architectures, methodologies, and programming languages.

To address customers’ IBM i needs and the new challenges of IBM i security, [I.GAYTE.IT](#) created STR-iCT and AD-iCT, two innovative security software solutions for the IBM i platform.

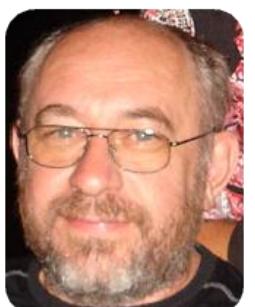

These solutions have been certified and were awarded the “Technologies of the Future” label by the France 2030 program. This distinction recognizes [I.GAYTE.IT](#)’s excellence in innovation and research.

Dominique GAYTE

Dominique Gayte, the founder of [I.GAYTE.IT](#), has been working with the IBM i platform for over 35 years. He led his first AS/400 training sessions for IBM in 1990. Since then, he has shared his expertise on this platform with hundreds—probably thousands!—of professionals worldwide.

A passionate and dynamic speaker, he has delivered numerous presentations, conducted hundreds of training sessions, and authored two reference books published by Eyrolles.

He is widely recognized as an expert in security, databases (DB2 for i), complex development, and the modernization of IT systems centered on IBM i.

IBM Champion

IBM
Champion
2025

He has been recognized by IBM as an IBM Champion for many years. IBM Champions are experts and community leaders with significant expertise in IBM products, services, and solutions.

IBM Champions are recognized by IBM for sharing their knowledge, expertise, and support with the IBM user community.

I.GAYTE.IT Software Solutions

STR-iCT is a software package that enhances the security and traceability of IBM i systems. It is essential for companies subject to new regulations (DORA, NIS2, etc.). STR-iCT is the only SIEM dedicated to IBM i.

AD-iCT provides all the key features necessary to manage and use Single Sign-On (SSO) with Active Directory in a production environment.

I.GAYTE.IT provides all high value-added services around IBM i security, from auditing to MCS (Maintaining Security Condition), including remediation and implementation.
